

Aerial Lift Train the Trainer Guelph

Aerial Lift Train the Trainer Guelph - The Aerial Lifts Train the Trainer Certification Program would teach trainers how to effectively train operators in safe industrial mobile machinery operation. Trainers are provided with in-depth instruction on aerial lift machinery. The program is offered on an open enrollment basis and delivered at selected training places. Prior to certification, trainers are evaluated and scored on their demonstrated skills and knowledge.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider in the industry, we offer top notch hands-on training. We give plenty of opportunities to practice the techniques and concepts that are taught inside the classroom. Together with hands-on experience, trainers develop general knowledge of instructional techniques and equipment theory, classroom and field communication skills, and ability to effectively train and evaluate operators. Trainers would gain an understanding of what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional techniques included in communicating concepts inside a classroom and/or field situation. Knowledge needs a training part to be effective in workplace environments. There are three factors of machine operation that the trainer must learn how to convey to operators: what to carry out; how to do it; and why it should be carried out.

The program provides detailed, up-to-date reference material to help trainers convey the subject matter to machine operators. Manuals contain detailed information about all aspects of industrial mobile equipment operator training. Included in the package are training aids that provide a visual reference so as to enhance the learning experience. The equipment-specific training products contain important materials intended for both the operator and the trainer: overhead transparencies, videos/DVD's, kinds of equipment, safety message posters; digital training aids and stability pyramid.
